A
Small step approaches linear equivalence
fraction of final production change
time (dimensionless)
explicit proneural
production lag
clamped A: 1.001×
max difference 0.063%
B
Same linear response, distinct large step
fraction of final production change
time (dimensionless)
explicit proneural
production lag
clamped A: 1.2×
max difference 12.0%
C
Same linear response, distinct large step
fraction of final production change
time (dimensionless)
explicit proneural
production lag
clamped A: 2×
max difference 31.9%
D
Linear observable equivalence at stable P0
relative D,N,A response difference
frequency ω
μ = -3
μ = 0
μ = 6
display floor 10⁻¹⁸
