A
A fitted clock does not transfer exactly
full
DNA, clock fitted at P2
P3
P2
P3 prediction: −16.5%
growth rate at $\mu = -3$
Notch production λ_N
B
Training and held-out conditions
P2 fit
training-range LS fit
growth prediction error (%)
λ_N
C
P2: one clock, all spatial modes
full
P2 clock × DNA
leading real part
graph eigenvalue μ
D
Stable P0, Delta-production forcing
full
clock × DNA
Delta response magnitude
frequency ω
